

NewGenAerospace

Integrity • Commitment • Solutions

A full service stocking supplier of aircraft spares, supporting the Airline, MRO and Aircraft Leasing Industry with three specialized divisions: Airframe, Engine, Distribution and Aftermarket services.

“Service that’s vital on the ground. Spares that are critical in the air.”

We understand who the real customer is...reliability and expediency is the name of the game and helping you keep your customers happy is our primary goal. Our company’s makeup revolves around three, core tenets to achieve this goal.

INTEGRITY

We want to satisfy all of our customers’ supply needs, however, integrity is first and foremost to any relationship and business transaction that we conduct with our customers and partners.

COMMITMENT

Our commitment not only revolves around an order and shipment, it revolves around building sustainable business relationships that are mutually beneficial.

SOLUTIONS

Our experienced staff is here 24/7, 365 days a year to provide you with unparalleled professional service and innovative solutions that are critical to your operations and net margin— contact us today!

AIRFRAME COMPONENTS

With NewGenAerospace, you can count on reliable support for multiple airframes for both Boeing & Airbus families of commercial aircraft. We provide programs tailored to customer requirements for initial provision, stock replacement, exchange services as well as our fully staffed A.O.G. Services Hotline.

ENGINE COMPONENTS

Our Engine Component Sales & Service division supports multiple powerplants in service on Boeing and Airbus commercial aircraft with main focus on commercial turbine engines manufactured by Snecma/CFM, General Electric, and Pratt & Whitney. We’ll tailor our solutions to your exact requirements.

EXCHANGE PROGRAMS

If you are encountering recurring delays due to market availability and need an in-facility stock of parts and items, we can design a custom-exchange program that suits your precise inventory needs.

We strategically stock items in our exchange pool to support customers’ regular requirements thereby minimizing aircraft downtime and shipping and repair delays by having items ready for immediate installation.

PROVISIONING AND STOCK REPLACEMENT

Your fleet changes and so do your requirements for airframe and engine spares to keep those aircrafts in service. Whether the change is due to additional aircraft or to increase efficiencies, NewGenAerospace has a cost effective solution for you. We will address your requirements by combining our stock position, distribution channels and aftermarket expertise — we are confident our solutions can save your budget.

In additional to initial provisioning, NewGenAerospace can provide competitive quotes to support your daily operating requirements. Let us use our aftermarket expertise to help you cut down on your repair costs, reduce shop time and reduce your spare inventory turn via our ready-to-go spares.

ASSET MANAGEMENT PROGRAM

In competitive times, every asset has potential significant value. NewGenAerospace can turn your dormant assets into additional operating capital.

We are always looking to purchase additional stock, therefore, please feel free to forward a listing of your surplus for review to sales@newgenaerospace.com. We’ll review and respond the very same business day.

DISTRIBUTION AND AFTERMARKET SERVICES

Manufacturers know their business and have proven sales channels in which to provide their products. Let NewGenAerospace help open up a new channel for your products and add value to your company’s current proposition offering.

With decades of contacts and an experienced sales staff ready to work with you, NewGenAerospace has a proven aftermarket sales channel that includes airlines, heavy maintenance facilities and contracted, power by the hour customers. Let our team open up a new area for your business without adding the cost of additional staff to your budget.

QUALITY CONTROL

Our primary objective is to support our customers by providing high quality, reliable aircraft spares. Our quality program is managed by an on site Quality Control professional and is accredited to the FAA AC-0056B standard.

In addition, our quality assurance program conducts a rigorous review of all of our vendors, and we maintain an approved vendor listing covering all aspects of our global supply chain – ensuring the quality and traceability of all spares supplied to meet your requirements.

To download our FAA standard certificate or vendor quality survey, please visit our Quality Control page at: www.newgenaerospace.com

Since 1929, Triumph Thermal Systems (TTS) has been providing high-quality thermal management technologies to commercial customers worldwide.

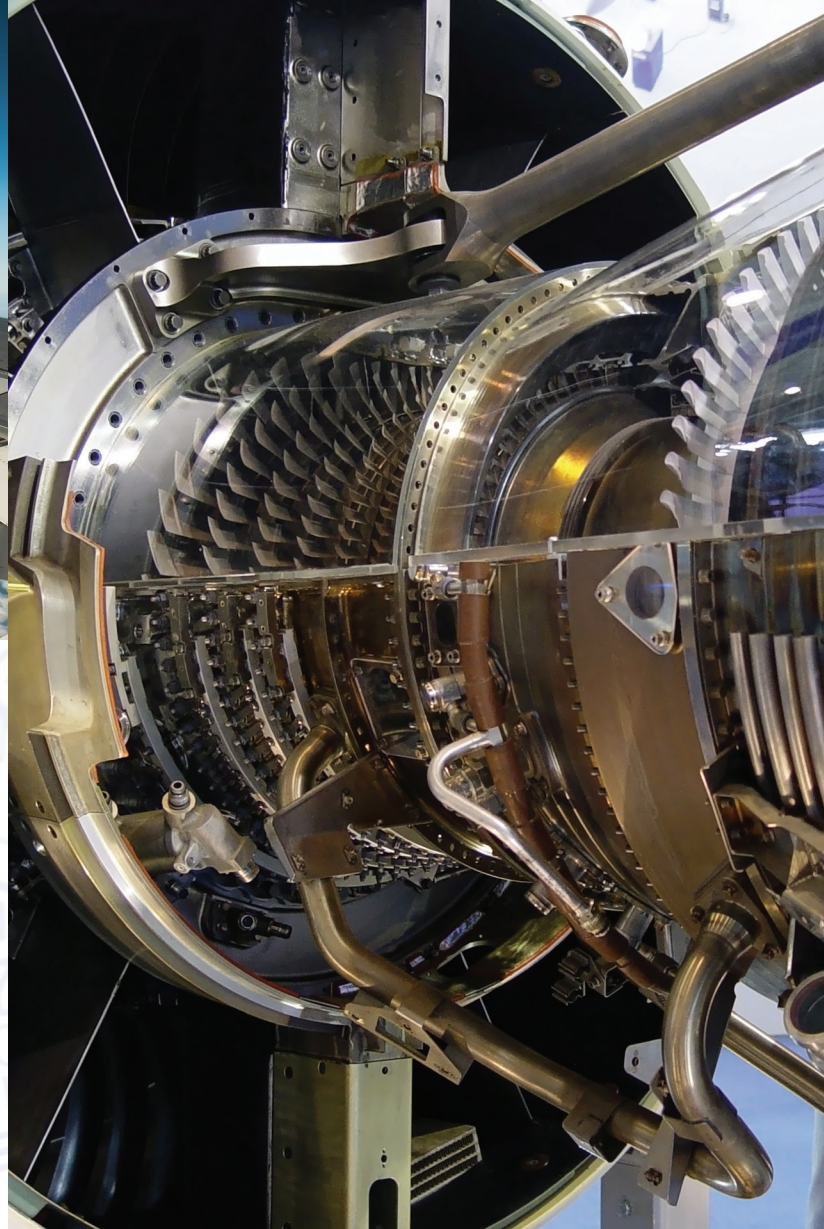

With in-house design, development, testing, and manufacturing capabilities, along with NewGenAerospace's quality service and innovative programs, the partnership is uniquely able to bring solutions to market faster than anyone else in the business.

Triumph Thermal Systems is a premier solution provider for aircraft thermal management systems and support and they also:

- provide heat exchangers in aluminum, stainless steel and iniconel material options for both plate fin and tubular geometries
- support Liquid Cooling Systems for airborne electronics thermal management
- provide high-quality thermal management technologies and is committed to being a leading global manufacturer and supplier of heat exchange and thermal transfer systems and components
- provide Plate Fin, Tubular, Surface Heat Exchangers, Liquid Cooling Systems, Electronic cooling systems, oil reservoirs and High Temperature Bleed Air Environmental Control System heat exchangers
- are certified by the FAA, CAAC and EASA.

NewGenAerospace is the aftermarket distributor of TTS' factory new material, rotatable product and piece parts. Additionally, we can facilitate the repairs of TTS products and reduce the shop-turn-time to zero with an in-house, customized exchange pool. NewGenAerospace is the authorized repair management administrator for all Triumph Thermal Systems.

For the People's Republic of China, Hong Kong, Macao and Taiwan markets, NewGenAerospace is the exclusive distributor.

“...try NewGenAerospace
for our dependability
and ingenuity.”
