

# PW4000 ENGINES

## Buffer Cooler

**UA541761-6 & UA541761-7**

**Engine Series: -4164, -4168, -4168A**

The UA541761 and UA541762 series air cooler assemblies are heat exchanger units that are constructed of welded INCONEL 625 components. The air cooler assembly consists of a plate-fin core that contains passages for directing the flow of hot air to be cooled through the core.

The air cooler assembly is an air-to-air heat exchanger used to cool the No. 3 bearing compartment buffer air. Buffer air is bled from the 12th stage bleed manifold and routed to and from the air cooler assembly by external tubing. Low pressure compressor discharge bleed air is used as the coolant. As hot buffer air flows through the air cooler assembly hot air circuit, heat is transferred through the plate-fin core to the low pressure compressor air in the cold air circuit. Cooled buffer air is then routed to the No. 3 bearing compartment. The warmed coolant air is discharged into the fan duct.

With Triumph Thermal Systems' in-house design, development, testing, and manufacturing capabilities, along with NewGenAerospace's quality service, innovative programs and distribution networks, our partnership is uniquely able to bring solutions to you faster than anyone else in the business.

Since 1929, Triumph Thermal Systems (TTS) has been providing high-quality thermal management technologies to commercial customers worldwide.

### TRIUMPH THERMAL SYSTEMS:

- provides heat exchangers in aluminum, stainless steel and inconel material options for both plate fin and tubular geometries
- supports Liquid Cooling Systems for airborne electronics thermal management
- provides high-quality thermal management technologies and is committed to being a leading global manufacturer and supplier of heat exchange and thermal transfer systems and components
- is a premier solution provider for aircraft thermal management systems and support
- provides Plate Fin, Tubular, and Surface Heat Exchangers, Liquid Cooling Systems, Electronic Cooling Systems, Oil Reservoirs and High Temperature Bleed Air Environmental Control System Heat Exchangers

**Exclusively Distributed By:**

**NewGenAerospace**
